

ROTARY WALKING FOR WATER

SATURDAY 23RD MARCH 2013

Walking For Water originated in the Netherlands in 2002, and is now a Global event and part of the United Nations World Water Day.

It's an event designed to inspire and motivate our children and teenagers by highlighting the problems faced by women and children in Africa when obtaining clean water and sanitation.

Its goals are to build awareness, raise money and provide support and funding for key water projects in various African countries.

THE CHALLENGE: TO CARRY **6 LITRES** OF WATER **6KM**

A task undertaken by millions of African women and children everyday of their lives.

We are inviting schools, clubs and youth organisations in the Chelmsford area to come together to raise money and make a real difference to peoples lives.
